

9/12 Art 82

CAMERA'S MANUAL = AE

EXPOSURE comp. value - EV  RETURN to "0"!

Spot - Pattern - Center Weighted = Auto Focus ZONES

AE-Lock AF-Lock Practice with this

Camera only knows middle gray value (18%) = (ZONE 5)

meter palm of hand - brackets exposure (ZONE 6)

custom settings in "P" mode stay when camera is powered off.

Overexposure NOT best for JPEG - Slightly under optimum.

EVERY shot from now on: Under expose (bracketing)

Equivalent Bracketing - ISO compensation to reach same value

High Dynamic Range Blends bracketed series to increase overall saturation, highlights, contrast.

Start reviewing the histogram, watch bracketing influence.
